The transport services market consists of sales of transportation services and related goods by entities (organizations, sole traders, and partnerships) that transport goods and people from one location to another for an amount or fee. The transportation services industry includes establishments that provide services to move people, goods, and materials through air, rail, road, water, and pipeline. The market also comprises sales of warehousing and storage services by entities that are involved in the operation of warehousing and storage facilities for merchandise, refrigerated goods, and other materials.

[Global Transport Services Market Trends](#)

Companies are actively pursuing electricity to power buses to reduce carbon emissions and cut costs. Solar buses run on electric batteries which in some cases are also charged by solar panels installed on the roof of the bus. This improves the fuel efficiency of the vehicle and increases the life of lithium batteries. Further, the technology has low maintenance components allowing the companies to save costs.
