Types of Building Permits in DC & MD Executed by Tejy Inc.:

- Support of Excavation (SOE): [SOE permit](#) is a provisional earth retaining system planned to control the ground for a safe & effective space for the construction. Often, SOE System acts as permanent structural support.
- Addition Alteration Repair: A construction permit is essential for adding or remodeling a building, including single-family, multi-family, commercial or industrial construction.
- After Hours: Construction conducted outside of permitted construction hours must have a permit for after-hours construction.
- Awning: If an awning is installed outside commercial or industrial buildings in DC at 1st floor or below, an awning permit approval is required.
- Bostcard: This is an online permit for small scale building projects that are restricted to specific work scope determined by DCRA (Department of Consumer and Regulatory Affairs).
- Excavation: This deals with what should be included for excavating additional items.
- Capacity Placard: The District of Columbia Construction Code entails that assembled occupancies should have an occupancy load of the room near the main exit or exit access doorway.
- Demolition: The elimination of structural framing members, along with the change of the exterior envelope, is considered a complete demolition and should comply with the requirements.

Building Permit Process by Tejy Inc.

Excavation Checklist for Obtaining SOE Permit

DCRA Permit in Washington DC

•Fence: The fence that shields inhabitants from neighbors, keeps pets inside and kids safe may need a [building permit approval](#).

•Foundation: The purpose of the Foundation Only Permit procedure is to clarify the building division requirements while requesting a foundation only permit.

•Garage: In most jurisdictions building a garage needs approval. Acquiring a garage building permit is essential when you add a new garage.

•Firework Stand: The formation of a temporary firework stand is subject to the review and approval of the Commissioners.

•Historic: Historic Property is a special permit from the Department of Consumer and Regulatory Affairs.

•Raze: A raze permit is an authorization for the complete demolition of a building or structure.

•Scaffolding: If you want to place scaffolding on any part of the highway, you must apply for approval. You should exhibit a laminated copy of the current license on the scaffolding, where it stands on the highway at all times.

•Retaining Wall: If your local governing agency requires that your retaining wall project requires approval, and you fail to obtain one, a stop-work order may be issued.

•New Building: This is a building permit, which is required for an owner or contractor of a property to construct any new building or structure.

•Demolition: The elimination of structural framing members, along with the change of the exterior envelope, is considered a complete demolition and should comply with the requirements.

•Foundation: The purpose of the Foundation Only Permit procedure is to clarify the Building Division requirements while requesting a foundation only permit.

•Shed: If you build a shed, barn or other structure on your property without building approval, you could get slapped with a fine for not going through the proper channels.

•Sheeting & Shoring: A Sheeting and Shoring approval must be obtained when a developer intends to excavate and install sheeting and shoring in preparation for a new structure.

•Sign: This facilitates installing, altering, & retrofitting lighting for any sign that has an area larger than 5 square feet or is connected to an electrical power source, including outline and border tube lighting.

•Soil Boring: An approval is essential for monitoring soil borings at a site. For any repair, modification or abandonment of structure, an abandonment permit is required.

•Tenant Layout: You must obtain approvals for a new tenant layout to an existing building. For this, you have to seek a Tenant Layout Permit.

•Tent: An operational sanction is required for a tent or an air-supported temporary membrane structure.

Permit Facilitation Service

- Swimming Pool: Each application for a swimming pool creation approval needs detailed barrier requirements to be included as part of the pool construction.
- Tower Crane: Tower Crane Construction Approval in DC is essential before the construction of a fixed structure.
- Underground Storage Tank: An underground storage tank (UST) as per United States federal regulations, is a storage tank, excluding underground piping connected to the tank, that has at least 10% of its volume underground.

Sukh Singh, the Vice President of Tejyy Inc. stated – “Our veteran permit expeditors maximize value for construction project with the help of approval plan. We consider every permit plan to be a full set of documents which is an extremely vital part of the construction work process. Using a proficient construction plan, we include comprehensive specifications about technical drawings, maintenance instruction and other documents like explanatory diagrams, charts, tables, expert opinions, survey reports, etc. Through the technical specifications acting as a part of the building plan, we submit to the government for written approval. Once the authorization is given for use, the project gets started.”

Tejyy Inc. [permit expediting service provider in USA](#) has gained considerable experience in making plans for construction projects, meeting building codes. Take expert advice from Tejyy Inc. to ensure that the building structure is free from the potential destruction of unsafe construction.
