SHERIDAN, WYOMING, UNITED STATES, April 18, 2022 /EINPresswire.com/ -- According to the latest report by IMARC Group, titled "[United States Textile Recycling Market: Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026](#)," the market is expected to witness steady growth during the forecast period (2021-2026).

[Textile recycling](#) involves the reuse and reprocessing of scraps, old clothing items, fibrous waste materials, etc., obtained from clothes, footwear,

[furniture](#), tires, towels, sheets, etc. It offers several environmental and economic benefits, such as reducing dependence on virgin fibers, preventing the use of chemical dyes, lowering consumption of energy and water, decreasing land and water pollution, etc. As a result, recycled textiles find widespread applications across multiple sectors, such as apparel, home furnishings, automotive, construction, mining, etc.

As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the industry behaviours of the consumers globally and our estimates about the latest market trends and forecasts are being done after considering the impact of this pandemic.

United States Textile Recycling Market Trends:

Rising concerns towards waste incineration and heavy industrial discharges from textile mills are primarily driving the United States textile recycling market. Moreover, the growing depletion of natural raw materials, like wood and silk, is also contributing to the market growth. Apart from this, the rising public awareness towards the benefits of recycling old clothes and the increasing number of collection bins for cloth sorting are also catalyzing market growth.
