The increase in the number of people suffering from obesity, unhealthy eating habits, physical inactivity, and the increasing geriatric population are some of the key factors which are leading to the increase in the global prevalence of diabetes. According to the US Centers for Disease Control and Prevention (CDC) in 2020, around 34.2 million people in the U.S. were suffering from diabetes.

[Insulin pens, syringes, pumps and injectors market](#) research shows that many companies are focusing on technological advancements to deliver insulin effectively and safely. For instance, the FDA also approved the Tandem Diabetes Care: Slim X2 insulin pump. This pump uses interoperable technology that allows patients to customize their diabetes management devices according to their preferences. These devices contain automated insulin dosing systems, continuous glucose monitors, blood glucose meters, or other electronic devices.
