The global computed tomography scanners devices and equipment market consist of sales of computed tomography scanners devices and equipment and related services. CT scanners are used in the diagnosis of various diseases including cancer, bone-related diseases, cardiovascular diseases, gynecological diseases, urological diseases, and other diseases. CT scanners use computer-controlled X-rays to create images of the body. A CT scan is a three-dimensional method of scanning.

Global CT Scanners Devices and Equipment Market Trends

Companies in the industry are integrating medical imaging with healthcare IT technology by providing digital access to improve patient safety, enhance healthcare facilities and save patients time and money. The data from CT scans are being integrated with an image processing and

communicating system such as a picture archiving and communication system (PACS) that brings CT images from multiple systems into one interface. This enables radiologists to securely store, digitally transmit electronic images and clinically-relevant reports, and make use of a comprehensive database of images to give an accurate diagnosis. These are increasingly incorporated and used for clinical analysis, diagnosis, and treatment in departments such as radiology, nuclear medicine imaging, cardiology, pathology, oncology, and dermatology.

Global CT Scanners Devices and Equipment Market Segments

The global CT scanners devices and equipment market is segmented:

By Product Type: Low Slice, Medium Slice, High Slice

By Application: Oncology, Neurology, Cardiovascular, Musculoskeletal, Others

By End-User: Clinics, Diagnostic Services, Hospitals

By Geography: The global CT scanners devices and equipment market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa.
