[Retail market trends](#) include increasingly investing in drones to reduce delivery times and increase profitability. A drone is an unmanned aerial vehicle (UAV), that is remotely controlled or flies autonomously using software-controlled flight plans in their systems. Using a drone for delivery allows retailers to cut costs and help in providing customers with their products earlier than traditional delivery methods. For example, Amazon has been investing in its Prime Air deliveries via drones, which claims to complete the delivery within 30 minutes. Amazon has started delivery trials via drones in the UK but is still waiting for regulatory approval in the US.
