Now, Mobile App user privacy is central to making and marketing mobile applications. Apple's IDFA policy limits major app marketing platforms such as Facebook ads, and Google ads to collect information about mobile app users between multiple apps. This led Facebook Audience Network efficiency (CPM rates) to drop by around 50% because of the IDFA policy change. As app marketers are looking for the best-performing ad creatives and continue to invest in paid users acquisition via Apple's Search Ads, Google UAC, and App Store Optimization, they strive to double their efforts. Besides App Development Agency chose app marketing companies that follow marketing channels like (a) Incentivized CPI, (b) Non-Incentivized CPI, (c) Social Media/Facebook Advertising, (d) Search Marketing (Google Adwords), (e) Television Advertising, (f) Co-Promotional Partnerships, (g) Mobile Site Redirection, (h) Get Featured as an "App of the Day", (i) Celebrity Features & Endorsements, (j) non-invasive in-app marketing (Mobile App Wall Advertising), (k) App Store Optimization, (l) Organic User Acquisition, (m) Paid Advertising, Influencer marketing, (n) Email Marketing, (o) Social Media Marketing, (p) Digital Video Marketing, (q) Traditional Marketing, (r) Press Releases, (s) Referral Invites, (t) App Directory Listing, and (u) Demos and Free Trials.
