The USA Mutuals Funds are distributed by Northern Lights Distributors, LLC.

Northern Lights Distributors, LLC and USA Mutual Advisors, Inc. are not affiliated.

The Fund's investment objectives, risks, charges and expenses must be considered carefully before investing. The statutory and summary prospectuses contain this and other information about the investment company, and they may be obtained by contacting 1.866.264.8783 or going to www.USAMutuals.com. Read it carefully before investing.

Mutual fund investing involves risk; principal loss is possible. The risks associated with an investment in a Fund can increase during times of significant market volatility. Remember, in addition to possibly not achieving your investment goals, you could lose all or a portion of your investment in the Fund over long or even short periods of time. Certain stocks selected for a Fund's portfolio may decline in value more than the overall stock market. Investments are subject to market risk, which may cause the value of the Fund's investment to decline. Common stocks are susceptible to general stock market fluctuations and to volatile increases and decreases in value as market confidence in and perceptions of their issuers change. Investment strategies employed for a Fund may not result in an increase in the value of your investment or in overall performance equal to other investments. The Funds may use leverage, invest in derivatives and sell securities short. Leveraging may exaggerate the effect on net asset value of any increase or decrease in the market value of a Fund's portfolio. Investing in derivatives may subject the Fund to losses if the derivatives do not perform as expected. Short sales involve selling a security that a Fund borrows and does not own. Short sales carry significant risk,

including the risk of loss if the value of a security sold short increases prior to the scheduled delivery date, since a Fund must pay more for the security than it has received from the purchaser in the short sale. Futures contracts are subject to the same risks as the underlying investments that they represent, but also may involve risks different from, and possibly greater than, the risks associated with investing directly in the underlying investments. The Funds may invest in foreign securities which involve greater volatility and political, economic, and currency risks and differences in accounting methods. This risk increases with emerging markets. Small and mid-size companies involve additional risks such as limited liquidity and greater volatility.
