The growing utilization of inulin in the production of dairy products on account of its stabilizing, thickening, and emulsifying properties represents one of the primary factors driving the inulin market across the globe. Moreover, it also improves the stability of emulsions and foams, including aerated drinks, sauces, ice creams, table spreads, etc. Besides this, the increasing consumer concerns towards gut health due to elevating occurrences of gastrointestinal tract diseases are further propelling the growth of the market. Additionally, inulin offers numerous benefits, such as [water](#) solubility, low friability, stability against gastric and intestinal enzymes, etc., which, in turn, is also escalating the product demand. Moreover, the rising prevalence of diabetes due to physical inactivity among individuals is anticipated to bolster the inulin market

over the forecasted period. Looking forward, IMARC Group expects the market to reach US\$ 2.33 Billion by 2027, exhibiting at a CAGR of 8.05% during 2022-2027.
