

Women's Hair Loss - New Information & Technology. Nationally Renowned, Dr. Puig Discusses Causes and Treatments.

Check out this video on women's hair loss. Dr. Puig, discusses women's hair loss and possible causes and treatments.

HOUSTON, TEXAS, UNITED STATES, April 22, 2022 /EINPresswire.com/ -- Unlike hair loss in men, women's hair loss has many causes other than inheritance and requires a detailed careful evaluation to arrive at the appropriate diagnosis and therapeutic recommendations.

Nationally renowned, Dr. Puig was given the opportunity to share his insights and 40 years experience on the topic at the annual meeting of the Texas Osteopathic Medical Association.

His presentation was designed to help navigate through the evaluation of female hair loss patients and present possible directional solutions this complex diagnosis.

In women, hair loss is a physical change associated with many different diseases. There are three categories of diseases that can be responsible for hair loss in women: Endocrine (Hormonal), Nutritional, and Autoimmune. Each category has several potential causes of hair loss. Dr. Puig's strategy organizes and simplifies an approach to evaluating the female patient.

“

Female hair loss is a very complex diagnosis to make”

Dr. Carlos Puig
