

Galleon Achieves ISO/IEC 27001 Certification

Galleon Embedded Computing is proud to announce its latest certification achievement in information security management.

KATY, TEXAS, UNITED STATES, April 21, 2022 /EINPresswire.com/ -- [The ISO/IEC 27001:2013](#) international standard provides a framework for establishing, implementing, and maintaining an information security management system (ISMS). Driven by continuous improvement, Galleon's certification in ISO/IEC 27001:2013 confidently communicates its dedication to examining vulnerabilities, assessing risk, developing controls, and maintaining a scalable information security solution for the future ahead.

Additionally, this certification contributes to the governmental [CMMC](#) (Cybersecurity Maturity Model Certification) compliance program, ensuring DoD-facing organizations handle controlled or otherwise sensitive data safely and securely.

Darren Thurston, Compliance & Quality Manager, states, "It has never been more critical for organizations to have adequate controls regarding information security. The benefits of implementing and maintaining an independently audited system are significant. This new certification gives our customers confidence that we take information security seriously. Over the past decade, Galleon's experience with a certified aerospace & defense quality management system has aided us in delivering the levels of quality our customers consistently demand."

[Galleon Embedded Computing](#) is a military-focused leader in the development of high-performance, high-quality storage solutions and small, rugged data recorder systems, servers, and network-attached storage devices. Galleon has been part of the Spectra Aerospace & Defense group since August of 2021, a trusted collective of defense electronics companies providing innovative solutions in support of national security requirements around the world.
