Report 2022: Market Size, Trends, And
Forecast To 2026*

LONDON, GREATER LONDON, UK, April 21, 2022 /EINPresswire.com/ --

According to 'Pancreatic Cancer Drugs Global Market Report 2022 – Market

Size, Trends, And Global Forecast 2022-2026' published by The Business Research Company, the [pancreatic cancer drugs market size](#) is expected to grow from \$3.45 billion in 2021 to \$3.71 billion in 2022 at a compound annual growth rate (CAGR) of 7.5%. The growth in the market is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The global pancreatic cancer drug market size is expected to reach \$4.67 billion in 2026 at a CAGR of 5.9%. The increasing prevalence of pancreatic cancer is expected to drive the pancreatic cancer drugs market growth.

The global pancreatic cancer drugs market consists of sales of drugs used to treat pancreatic cancer. Pancreatic cancer is a disease caused by the unrestrained growth of cells in the pancreas, thus disrupting the production of digestive juices and hormones responsible to regulate the blood sugar level in the body. This abnormal growth of cells leads to tissue lumps referred as tumors. The presence of tumors hinders the normal pancreas functioning.

Global [Pancreatic Cancer Drugs Market Trends](#)

The concept of combination therapy over monotherapy is one of the latest ongoing trend in the pancreatic cancer drugs market. Major players in the market understand that the combination of two or more drugs is a suitable way to increase the efficacy of the drugs and thus increasing the
