

How healthcare providers are adapting in the Era of Telehealth ?

The increased use of technology and the emphasis on hybrid healthcare will have lasting impacts on our current healthcare system for patient care.

VANCOUVER, BC, CANADA, April 21, 2022 /EINPresswire.com/ -- The Telehealth Industry, which has grown tremendously amid the pandemic, faces some uncertainty as more states end waivers allowing care across state lines. As many states' emergency regulations permitting such care wind down and the patchwork system of state rules becomes patchier, millions of patients are losing expanded access to telehealth.

The Global [Telehealth Market](#) size reached USD 70.5 Billion in 2020 and is expected to register a revenue CAGR of 29.2% during the forecast period, according to latest analysis by Emergen Research.

Rising healthcare expenditure and increasing prevalence of chronic diseases are some of the major factors boosting revenue growth of the market. In addition, significant increase in government expenditure on healthcare information Technology (HCIT) sector and rising focus among key players toward bringing innovation into digital diagnostics is further driving market growth. Moreover, continuous advancements in medical diagnostic technologies are projected to create lucrative opportunities for the growth in the near future.
