The annual list and research report identify and honor the top 100 MSPs in healthcare, legal, government, financial services, manufacturing and additional vertical markets. Additionally, this year's report affirms that vertical market MSPs have vastly expanded their managed security capabilities and also revealed key MSP business, security and market trends.

Among the report findings:

- **Surging MSP Revenues:** Honorees generated a combined \$3.1 billion in vertical market annual recurring revenue (ARR) in 2021, up 42% from \$2.1 billion million in 2020. The surge was driven by extremely strong MSP merger and acquisition (M&A) activity; accelerated demand for cloud & cybersecurity services; and successful MSPs pivots amid the continued COVID-19 pandemic.
- **Key Verticals:** The most successful vertical market MSPs are zeroing in on healthcare and manufacturing, with continued strong interest in financial services, legal and government opportunities.
- **Managed Security Services:** All honorees offer some form of managed security services – particularly backup and disaster recovery (96%), endpoint detection & response (EDR, 88%) and managed detection and response (MDR, 82%). Moreover, the MSPs increasingly focus on emerging areas such as Cloud Security Posture Management (CSPM, 49%) and eXtended Detection and Response (XDR, 38%).
- **End-Customer Reach:** The Top 100 Vertical Market MSPs now manage more than 6.1 million users across their customer sites as of 2021, up from 3.1 million in 2020.
