The partnership between CAG and Abacode will allow clients to one-stop-shop for specialized IT [Managed](#)

[Services](#), Governance, Risk Management, and Compliance (GRC), Virtual CISO services and managed XDR services to analyze data breaches as they occur.

As organizations face increasing threats of ransomware, data breach, and phishing, they must simultaneously upgrade their governance and compliance activities to minimize risk while simultaneously detecting and responding to breaches as they arise to understand, contain and prevent them. This capability requires increasingly scarce competent cybersecurity leadership and specialized, virtual Security Operations Center (vSOC) services that can investigate problems in real-time and provide visibility across the enterprise of controls compliance.

“

In this time of increasing global attacks, it is critical to have around-the-clock eyes on the network.”
