Home Infusion Therapy Market Industry Definition and Application:

Home infusion therapy refers to a medical procedure used in the intravenous (IV) or subcutaneous administration of drugs or biologics to a patient at home. It involves the infusion of medications like antivirals or immune globulin through pumps, vials, catheters, etc. This method is effective in chemotherapy and hydration, inotropic, enteral, anti-infective, nutritional, and pain management therapies for the treatment of diabetes and different gastrointestinal and

oncological disorders. Besides this, it facilitates self-administration of drugs in medical conditions where oral medications are not effective.

Note: We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

Home Infusion Therapy Market Trends and Drivers:

The increasing cases of chronic medical ailments, like cancer, osteoarthritis, diabetes, etc., and shifting consumer preferences towards at-home treatments are primarily driving the global market for home infusion therapy. Moreover, the growing incidences of hospital-acquired infections (HAIs) upon exposure to contaminated equipment, bed linens, air droplets, etc., is also driving the demand for home infusion treatment. Additionally, the ongoing global COVID-19 pandemic is escalating the need for this therapy to minimize the spread of infection and ensuring optimal treatment. Additionally, the development of cost-effective, portable, and user-friendly home infusion kits that are equipped with advanced drip systems to facilitate precise and real-time monitoring of IV treatments is further contributing to the market growth. Besides this, the expanding geriatric population and improving healthcare infrastructures are anticipated to further propel the market growth in the coming years.

Home Infusion Therapy Market Segmentation:

The report has segmented the market on the basis on region, product and application.

Breakup by Product:

- Infusion Pumps
 - Elastomeric
 - Electromechanical
 - Gravity
 - Others
- Intravenous Sets
- IV Cannulas
- Needleless Connectors

Breakup by Application:

- Anti-Infective
- Endocrinology
- Diabetes

Others
Hydration Therapy
Athletes
Others
Chemotherapy
Enteral Nutrition
Parenteral Nutrition
Specialty Pharmaceuticals
Others

Breakup by Region:

North America:(United States, Canada)
Asia-Pacific: (China, Japan, India, South Korea, Australia, Indonesia, Others)
Europe: (Germany, France, United Kingdom, Italy, Spain, Russia, Others)
Latin America: (Brazil, Mexico,Others)
Middle East and Africa

Who are the Major Home Infusion Therapy Market Key players?

The report provides a detailed analysis of the market leaders, including.

B. Braun Melsungen AG, Baxter International Inc., Becton Dickinson and Company, Eli Lilly and Company, Fresenius SE & Co. KGaA, ICU Medical Inc., JMS Co. Ltd., Nipro Corporation, Option Care Health Inc. (Walgreen Co.), Smiths Group plc and Terumo Corporation.
