#### Some Key Highlights from the Report

By product, antimicrobial held the largest nanocoatings markets share in 2019 and is expected to grow at a rate of 18.0% in the forecast period. Antibacterial applications of nanocoatings are garnering importance to avert the disastrous impacts of antibiotic resistance. Nanocoatings may be used as diagnostics, preventives, drug carriers, and synergetic in the antimicrobial therapies.

By industry vertical, the building & construction sector is likely to grow at a rate of 18.5% in the period 2020-2027. Nanocoatings are the thin film coatings of the nanoscale range that are implemented to protect the surface of numerous construction materials, such as glass, concrete, marble, steel, and sand limestone, among others. These coatings assist in protecting them from friction reduction, heat resistance, corrosion, and environmental influences, including algae, moss, water, and oil stains.

By distribution channel, the online distribution channel is projected to grow at a faster rate of 20.9% in the period 2020-2027, as this mode of distribution has the advantage of providing a broader exposure to the product produced by the manufacturers, especially with the proliferation of smart devices and internet connectivity.
