Agriculture is one the fastest growing industry across the globe due to increasing demand for good quality food and rapidly expanding global population. The agricultural sector is rapidly

Reports And Data

gaining traction over the recent years and is expected register significantly higher revenue CAGR over the forecast period. High revenue growth is attributed to factors such as technological advancements in the agricultural sector, increasing demand for organic products and fertilizers and rising adoption of advanced techniques and products to increase crop yield. In addition, increasing environmental concerns and water shortage around the globe, and increasing environmental awareness among consumers and farmers, and rising adoption of smart and precision farming are fueling market growth.

The report has been formulated through extensive primary and secondary research and in accordance with the impact of the COVID-19 pandemic on the revenue growth of the market and consumer demand. The report also provides details about the strategic initiatives taken by the major market players to cater to global consumer demand and gain a robust footing in the market.

Increasing investments in vertical farming, rising adoption of field mapping and high demand for drone farming and increasing investments and government funds to develop enhanced products to obtain better crop yield and efforts taken by public and private organizations to make farmers aware of the advanced techniques are expected to further fuel market growth going ahead.
