The Business Research Company's Starch Derivatives Global Market Report 2022 – Market Size, Trends, And Global Forecast 2022-2026

LONDON, GREATER LONDON , UK, April 25, 2022 /EINPresswire.com/ --

Technological advancements in the [starch derivatives market](#) is shaping the industry by increasing the shelf life of the product. According to starch derivatives market research, with the development of latest technologies

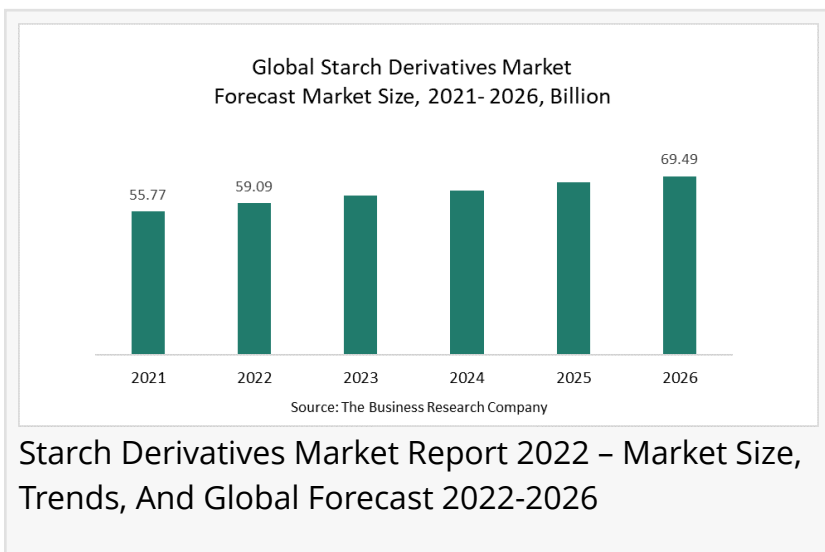

and advanced experiments in the food and beverage industry the integration of starch derivatives across different sectors is expanding. For example, in March 2020, Tate & Lyle, a UK-based provider of food and beverage ingredients and solutions, announced the addition of CLARIA Clean Label Starches to its line with the launch of Claria Everlast. Claria Everlast is an innovative clean label starch that produces superior shelf stability which helps maintain food quality, particularly under severe storage temperatures. In another instance, in November 2020, Germany based food production company, Beneo, launched the first-ever instant functional rice starch which helps manufacturers produce clean label food preparations, such as cold processed sauces, dressings, dairy desserts and bakery fillings. The starch also provides stability during the entire shelf life of a retail product.
