The sugar substitutes market consists of sales of sugar substitute products by entities (organization, sole traders, and partnerships) that are chemical or plant-based substances used in food and drinks as additives to enhance sweet flavor. Sugar substitutes provide health benefits due to low calories and can be consumed in a variety of ranges including stevia, aspartame, maltitol, neotame, and others. Sugar substitutes are used in breakfast cereals, pudding, tea, and other sweet beverages.

Global Sugar Substitutes Market Trends

The development of the fermentation process is a key trend gaining popularity in the sugar substitutes market. The fermentation process is increasingly being used to develop sugar substitute products from the stevia plant. Fermentation is being used by scientists as a unique method for making Rebaudioside M (Reb-M) to sustain the purity and sweetness of sugarcane in natural sugar substitute similar to regular sugar.
