It gives key information about the latest product launches, technological

advancements, delivers and call for ratio, and regulatory framework. The document additionally gives information about marketplace size, marketplace share, sales growth, and CAGR in the course of the forecast length of 2020-2027. The document additionally gives key insights into approximately pinnacle organizations withinside the marketplace at the side of an intensive SWOT evaluation, Porter's Five Forces evaluation, and feasibility evaluation to provide an aggressive facet to the readers. The document specializes in the latest trends, main demanding situations, opportunities, and boundaries touching on the continuing pandemic.

The global [Healthcare Chatbots Market](#) is forecasted to be worth USD 594.8 Million by 2027. The healthcare chatbots market is anticipated to expand exponentially over the forecast period. The growth in the demand for chatbots apps is due to the rise in internet penetration and usage of smart wellbeing devices, and increasing awareness of self-monitoring techniques in diagnosis and treatment. The rising need for virtual health assistance is expected to further drive market growth. During the forecast timeline, a lack of expertise in the development of chatbots is expected to hinder market growth.

Key Highlights from the Report

In February 2017, in a cash-and-stock deal valued at around USD 36.0 million, Nuance

Communications acquired Noida-based mobile value-added services company carbon Tech Innovations. This is a tailored deal for Nuance that will further extend its current Value-Added Services and subscription business services portfolio, which is currently distributed throughout Latin America, Northern America, Europe, and Australia, and boost the carriers' services in India, Africa, and Southeast Asia.

During the forecast timeframe, the software segment is expected to dominate the market with a CAGR of 20.5%. The growth of diverse applications for patients and health care providers is expected to fuel segmental growth.

Over the forecasted period, the healthcare provider segment accounted for the largest market with a CAGR of 20.5%. Significant medical records, such as patient information, hospital inventory, billing records, and patient medical records, are managed by healthcare facilities. Increasing patient flows in hospitals and clinics will create tremendous demand for healthcare chatbot applications by offering interactive assistance for healthcare facility operations.
