Malware Analysis Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026

SHERIDAN, WYOMING, UNITED STATES, April 26, 2022 /EINPresswire.com/ -- According to the latest report by IMARC Group "Malware Analysis Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026", The [global malware analysis market](#) exhibited strong growth during 2015-2020. Looking forward, IMARC Group expects the market to grow at a CAGR of around 26% during 2021-2026.

Malware analysis refers to the process of detecting, examining, and mitigating potential threats posed by viruses and cyberattacks. It involves manual code reversing, interactive behavior, static properties, and fully automated analysis. Malware analysis generates actionable information that helps organizations combat next-generation attacks and prevents additional compromise. It also aids in assessing security threats, identifying sources of attack, uncovering hidden indicators of compromise (IOCs), and improving the efficiency of alerts and notifications.

Market Trends:

The increasing instances of cyberattacks due to rapid industrial digitization and automation of business operations are majorly driving the global malware analysis market growth. In line with this, the introduction of the bring-your-own-devices (BYOD) working model in the corporate sector is further facilitating the widespread adoption of malware analysis. Moreover, the healthcare industry is predominantly employing these services to maintain electronic health records (EHR) and ensure smooth delivery of system-generated documents, which is creating a positive outlook for the market.
