Report Metric

Historical: 2016-2021

Base Year: 2021

Forecast Year: 2022-2027

We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

An automatic door includes components, such as gear motors, controllers and sensors, for automatically opening or closing a door. It is used in different complexes to provide a convenient and comfortable access solution and add aesthetic value to spaces. It is sound-proof, fast and energy-efficient and enables easy access to a premise. Presently, it is widely installed in airports, hospitals, supermarkets, restaurants, offices, hotels, and shopping malls across the globe.

Market Trends

The global coronavirus disease (COVID-19) outbreak has increased the need for automatic doors

in residential, commercial, and industrial complexes to minimize the risk of contamination. In addition, automatic doors can be operated via mobile applications and integrated with artificial intelligence (AI), the internet of things (IoT), and cloud computing solutions. Apart from this, rising investments by governments of numerous countries in infrastructural development and smart cities are offering lucrative growth opportunities to market players operating in the industry.
