[Informants](#), tells a thrilling story of murder, betrayal, and heroism based on experiences from Nickerson's time as a DEA Special Agent in the Los Angeles Field Division. Nickerson's real-world experiences in the DEA, the people he met and worked alongside, the villains he faced, the heroics he witnessed, and the betrayals he endured –are the inspirations for a story that could've been ripped from today's headlines.

"Concise, realistic, entertaining. It gave me flashbacks to how things happen in the real world of narcotics trafficking," says Chip Lollar, a retired agent with Homeland Security, "Very well written. DEA, Drug Cartels, murder, kidnapping, shootouts, good guys have gone bad, and bad guys with heart." *The Informants* is perfect for fans of crime fiction and true crime alike.

Inspired by other realistic fiction writers like Tom Clancy & Jack Carr – Nickerson tells us a story meant for the big screen through the eyes of the people who live it. Multiple storylines, agendas, investigations, and perspectives come together in an explosive finale worthy of a summer blockbuster.

The Informants introduces us to Julian Castro Rodriguez, AKA: El Jefe – leader of the world's most violent drug cartels. His wife has just been poisoned, and El Jefe has placed a 10 million dollar reward for information leading to the capture of the assassin, or the identity of the mysterious individual who ordered the hit.

Meanwhile, the DEA holds a conference in Los Angeles, bringing together a task force to investigate and bring down El Jefe's cartel. These two worlds collide when Toro, a Cartel enforcer, kidnaps a DEA agent for leverage and information regarding the individual who ordered the

murder of El Jefe's wife.

Suddenly, agents in the field are thrown into a full-blown cold war – with both sides using their web of informants to gather intelligence on their opponents. These agents must balance their duty all while battling forces that play by a different set of rules. To tip the scales in their favor the agents begin operating outside the agency's drawn lines of right and wrong, producing both legendary and catastrophic results.
