

Predictive and prescriptive analytics Market size worth \$ 64.58 Bn Globally by 2028 at 25.4% CAGR: Emergen Research

Predictive and prescriptive analytics Market Trends – Rising government investment in big data.

VANCOUVER, BC, CANADA, April 27, 2022 /EINPresswire.com/ --

The global [predictive and prescriptive analytics market](#) is forecast to reach a market size of USD 64.58 Billion by 2028, and register a significantly high CAGR, according to latest analysis by Emergen Research. Revenue growth of the global predictive and prescriptive analytics market is expected to

increase significantly during the forecast period due to increasing demand for data-driven decision-making solutions. Rising adoption of business intelligence and analytics solutions across different industries and sectors is another major factor expected to further boost growth of the global predictive and prescriptive analytics market during the forecast period.

However, high cost to implement predictive and prescriptive analytics solutions is expected to restrain adoption, and in turn, impact growth of the global predictive and prescriptive analytics market growth to a certain extent during the forecast period.

The report considers the COVID-19 pandemic as one of the key influencing factors of the Predictive and Prescriptive Analytics market. The report discusses in detail the positive and negative impact of the pandemic on the Predictive and Prescriptive Analytics industry. The supply chain disruptions and economic volatility have altered the dynamics of the Predictive and Prescriptive Analytics industry. The report explores the effects of the pandemic on the market and its key segments and regions. It also offers a forecast estimation of the market growth in a post-COVID-19 scenario.
