The global coal, lignite, and anthracite market consists of sales of coal, lignite, and anthracite by entities (organizations, sole traders and partnerships) that mine bituminous, anthracite, and lignite coal by underground mining, strip mining, culm bank mining, and other surface mining techniques. It also includes the development of coal mine sites, and improvement of coal, including cleaning, washing, screening, and sizing of coal.

## Global Coal, Lignite, And Anthracite Market Trends

Coal mining companies are using 3D mine visualizers to obtain a real-time digital model of a mine. A 3D mine visualizer generates a three-dimensional model of the mine layout and transfers it directly to the operator. With a web-based interface, information about the model is available with any connected device. It offers full record and playback capabilities in 3D thus allowing operators to review and analyze historical data in order to improve productivity and identify best practices. 3D mine visualizers significantly enhance the productivity of large mining
