The report also includes competitor and regional analysis, and contemporary advancements in the market. The market is currently witnessing strong growth. The United States crypto ATM market to exhibit moderate growth during the next five years.

United States Crypto ATM Market

Cryptocurrency ATM is an internet-based kiosk that uses blockchain technology for enabling individuals to convert cash or credit into cryptocurrencies. These machines provide easy access to money across international borders, along with excellent speed without requiring bank details. Generally consisting of a display screen, ATM printer, software, and QR scanner, they auto-generate QR code receipts for every transaction. These ATMs are widely located in restaurants, shopping malls, and transportation hubs.

As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the purchase behaviours of the consumers globally and our estimates about the latest market trends and forecasts are being done after considering the impact of this pandemic.

Market Trends:

The market is primarily driven by the rising awareness regarding the benefits of cryptocurrency. This can be attributed to the rapidly growing adoption of digital currency as a substitute for cash. Also, the implementation of several initiatives legalizing the use of cryptocurrencies undertaken by the US government is providing an impetus for the market growth. Other factors, such as rapid digitization, continual technological advancements in security systems, and the advent of cryptocurrency accounting packages, are further contributing to the market.
