

# Himiway's Long-range E-Bikes pay attention to great details to better customer security

*Himiway's long-range e-bikes pay attention to small details to enhance customer safety.*

SACRAMENTO, CALIFORNIA, UNITED STATES, April 27, 2022

/EINPresswire.com/ -- Himiway, the market leader in [long-range electric bikes](#), was established in 2019. From 2019 until 2021, they introduced different models of e-bikes for their customers.

It gives one immense joy to enjoy the pleasant spring season by [taking a ride](#) on your e-bikes. However, not paying attention to small unobtrusive details can affect the life of the customers.

So what are the points to keep in mind for enhancing customers' security using e-bikes?

☐ Rainfall during the spring season is common in the US. Keeping the bike outside in the rain is not a good idea.

The metal parts in the bike can rust, and it can also damage the electrical

components of the motor and battery. It is ideal for keeping the bike in a cool and dry place.

☐ Keeping the bike clean from snow, dirt, and mud ensures that you can use the bike for a long time. Using a soft, clean, dry towel for cleaning the bike is ideal for taking care of the e-bike.

Many users utilize their old bath towels for cleaning their bikes.

☐ Thawing and re-freezing water on the roads during spring is a problem. Remaining careful about ice on the roads help ensure that you do not fall or slip on the e-bike.

☐ Annual maintenance for e-bikes is essential to keep them in good shape. The metal parts in the

bike can dry out, and the tires can lose air pressure over time.

□Do not ride the e-bike through deep water. It can harm the battery and motor of the e-bike. The e-bikes are weather-resistant, but they are not waterproof.

□It is always better to [keep the battery charged](#) at all times. No one wants to get caught in a storm without any power to get you home.

Himiway has a great customer service department that provides complete customer satisfaction. The customer service support is well trained and professional. They provide help on various queries and also provide tips on the annual maintenance of the bikes. With an increase in the staff, the company ensured that the customer problems can be resolved within 24 hours.
