Population growth in developing countries has a huge impact on the growth of the residential construction sector. In addition, industrial development also positively reflects the construction situation in APAC countries. Industrialization development is projected to drive demand for fuel and natural gas. Use of gas pressure controllers is mandatory in production facilities to control high gas pressure within the system. In addition, gas pressure regulators are widely used in industrial furnaces, large ovens, gas boilers, production plants, etc., in the oil & gas sector.

Overall, the growing oil & gas industry is predicted to drive the need for gas pressure regulators.

## Key Takeaways from Market Study

By product form, double-stage gas pressure regulators are expected to hold the highest market

share owing to the growing construction sector in APAC.

By gas type, the toxic gas segment is projected to increase at 5.5% CAGR by volume during the period of 2021 to 2031.

By country, China is anticipated to witness substantial growth in gas pressure regulator sales.

By application, the oil & gas sector expanded Y-o-Y of 5.6% in 2021.

"Demand for gas pressure regulators is highly driven for safety purposes with rising number of accidental instances due to overpressure in several industries. Additionally, increasing investments and the expanding industrial gases business across Asian countries is set to drive market growth," says a Persistence Market Research analyst.
