SHERIDAN, WYOMING, UNITED STATES, April 28, 2022 /EINPresswire.com/ -- According to IMARC Group's latest report, titled [India Cement Market: Industry Trends, Share, Size, Growth, Opportunity and Forecast 2022-2027](#), the India cement market is expected to exhibit a CAGR of 4.8% during 2022-2027.

We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

Cement refers to a binding material manufactured by calcining lime and clay and mixing it with water, sand, and gravel to make concrete. It contains a considerable amount of iron oxide, magnesium oxide, gypsum, and silica, which possess excellent plasticity and offer resistance to moisture. As a result, it is used in the construction of roads, buildings, bridges, dams, flyovers, and residential and commercial complexes across India.

Market Trends

The increasing population and inflating income levels represent one of the leading factors escalating the demand for cement in India. In addition, rising investments by the Government of India in mega infrastructural projects and restoration and remodeling of historical places to enhance the architectural aesthetics are offering lucrative growth opportunities to key players operating in the country. Besides this, the increasing focus on introducing green and environment-friendly product variants to minimize (CO₂) emissions is anticipated to drive the market in the coming years.
