

Biosimilar Hormones Global Market To Grow At Rate Of 28% Through 2026

The Business Research Company covers the biosimilar hormones market drivers and restraints, major players, and the impact of COVID-19 on the market.

LONDON, GREATER LONDON, UK, April 28, 2022 /EINPresswire.com/ --

According to 'Biosimilar Hormones Global Market Report 2022 – Market Size, Trends, And Global Forecast 2022-

2026' published by The Business Research Company, the biosimilar hormones global market size is expected to grow from \$1.74 billion in 2021 to \$2.31 billion in 2022 at a compound annual growth rate (CAGR) of 32.5%. The growth in the market is mainly due to the companies resuming their operations and adapting to the new normal while recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. As per TBRC's biosimilar interleukins market outlook the market is expected to reach \$6.22 billion in 2026 at a CAGR of 28.1%. The prevalence of deficiencies in growth hormones and metabolic hormones contributes to the market.
