The defense and aerospace sector is rapidly gaining traction over the recent past and is expected to grow significantly going ahead. Revenue growth is attributed to factors such as increasing border disputes, increasing need for advanced military weapons and systems for land, sea and air, increasing investments to develop technologically advanced aircrafts and space systems. In addition, availability of advanced camera technology for military purposes, rising funds by various public and private sectors for upgrading existing systems and increasing investments to develop crewless airways and UAVs are expected to fuel market growth going ahead.
