

Electronic Health Records Market See Incredible Growth 2021-2027 | Epic Systems, Allscripts Healthcare Solutions Inc etc

Growing focus on improving the quality of patient care and rapid digitization of medical records are expected to drive market revenue growth.

VANCOUVER, BC, CANADA, April 28, 2022 /EINPresswire.com/ -- The Global [Electronic Health Records Market](#) report presents comprehensive information covering insightful data for businesses and investors for the time period of 2020-2027. Electronic health records (EHRs) are now being created, used, edited, and viewed by multiple

independent entities such as primary care physicians, hospitals, patients and insurance companies. EHRs are widely used in primary care exam rooms to register and access records of patients along with online medical information and decision making-tools and these EHRs have changed the dynamics of patient-clinician interaction by facilitating seamless communication through email, virtual consults, and telemedicine.

Electronic Health Records are a systemized collection of crucial health information about the patient and population, essentially a digitized paper chart of a patient. Electronic health records are patient-centric documents that facilitate easy availability and retrieval of vital information to authorized personnel. EHRs improve patient care outcomes by reducing the probability of medical errors, duplication of documents, delays in treatments, and improves the clarity of the medical records.
