

Deep Packet Inspection and Processing Market Report 2021, Industry Trends, Share, Size, Demand and Future Scope 2026

SHERIDAN, WY, UNITED STATES, April 28, 2022 /EINPresswire.com/ --

According to the latest report by IMARC Group, titled "[Deep Packet Inspection and Processing Market Size](#): Global Industry Share, Size, Growth, Trends, Opportunity and Forecast 2021-2026," The global deep packet inspection and processing market is expected to exhibit strong growth during 2021-2026. Looking forward, IMARC Group expects the market to grow at a CAGR of around 25% during the forecast period.

Deep Packet Inspection and Processing Market

Deep packet inspection (DPI) refers to a technique of decoding computer network traffic and re-routing or blocking packets containing specific data or code payloads from passing through the inspection point. It helps end-users in internet eavesdropping, data mining, internet censorship, advanced network management and security operations. The technique is widely used to identify attack signs in specialized cybersecurity products, such as intrusion prevention systems (IPS), intrusion detection systems (IDS), and advanced firewalls.

Report Metric

Historical: 2015-2020

Base Year: 2020

Forecast Year: 2021-2026

As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the industry behaviours of the consumers globally and our estimates about the latest market trends and forecasts are being done after considering the

impact of this pandemic.

Deep Packet Inspection and Processing Market Trends:

The internet service providers (ISPs) widely rely on DPI for offering enhanced lawful interception, targeted advertising, quality of service (QoS), profiling of networked applications, etc. As a result, there is an increasing demand for DPI in the telecommunication and information technology (IT) sector. Moreover, the growing incidences of cybercrimes, the rising number of broadband subscribers, and the advent of data-intensive applications are also inducing the market growth. Additionally, the need for the DPI has surged to enhance censorship security and surveillance as governing bodies are dealing with a large amount of confidential data. Furthermore, the sudden outbreak of the COVID-19 pandemic has increased the adoption of the remote working model and network traffic, thereby augmenting the demand for DPI to improve QoS and decrease network congestion.

Global Deep Packet Inspection and Processing Market 2021-2026 Analysis and Segmentation:

Competitive Landscape:

The competitive landscape of the market has been studied in the report with the detailed profiles of the key players operating in the market.

Bivio Networks Inc., Cisco Systems Inc., Extreme Networks, Huawei Technologies Co. Ltd., IBM Corporation, Juniper Networks Inc., LogRhythm Inc., Netscout Systems Inc., Sandvine Inc. and Viavi Solutions.

The report has segmented the market on the basis of region, component, product, deployment mode, solution, organization size and vertical.

Breakup by Component:

- Solutions
- Services

Breakup by Product:

- Standalone
- Integrated

Breakup by Deployment Mode:

On-Premises
Cloud-Based

Breakup by Solution:

Hardware
Software

Breakup by Organization Size:

Small and Medium-Sized Enterprises
Large Enterprises

Breakup by Vertical:

Banking, Financial Services and Insurance
Government and Defense
Healthcare
IT and Telecom
Retail and Ecommerce
Manufacturing
Others

Breakup by Region:

North America: (United States, Canada)
Asia Pacific: (China, Japan, India, South Korea, Australia, Indonesia, Others)
Europe: (Germany, France, United Kingdom, Italy, Spain, Russia, Others)
Latin America: (Brazil, Mexico, Others)
Middle East and Africa
