

Virtuoso launches world's first Live Authoring capability: Empowering users to simultaneously validate real-time tests.

Virtuoso, the global leader in hyper automated testing, today announces the launch of their new Live Authoring capability.

LONDON, ENGLAND, April 30, 2022 /EINPresswire.com/ -- Virtuoso launches world's first Live Authoring capability: Empowering users to simultaneously author, execute and validate tests in real-time.

“

Live authoring is everything I had hoped for and more. Being able to debug and guarantee that our test steps work is absolutely transformative because of the speed at which we can now ensure quality”

Steven Baughan, Senior QA at Virtual1

Virtuoso, the global leader in hyper automated testing, today announces the launch of their new Live Authoring capability. The revolutionary new functionality allows users to author, execute, and validate their tests in real-time – which is entirely unheard of in the market today.

The new set of features enables bots to validate tests as they are being written ensuring that users know when their test is fit for purpose. In recent trials, Virtuoso's customers have seen test authoring times reduced by a ground

breaking 98x.

How it works:

Users can simply author once, see that their test has been tested, and move on to finding actual bugs and not debugging tests. This is all done in-sprint and at never-before-seen velocity. According to a study by GitLab, conventional Q&A testing is seen as a massive bottleneck for organizations as they aim to deliver new products and services at speed. Virtuoso's new Live Authoring platform not only addresses these historical challenges but presents a completely new and innovative way to spin, release and test in real-time.

The process in Virtuoso's new Live Authoring platform:

- Write tests at unrivalled speed and scale
- Use robotic processes in your test automation strategy

- Ensure your tests are ready to run, the second they are done
- Get in-sprint test automation with zero ramp-up
- "Live authoring is everything I had hoped for and more. Being able to debug and guarantee that our test steps work is absolutely transformative because of the speed at which we can now ensure quality" - Steven Baughan, Senior QA at Virtual1

About Virtuoso:

Virtuoso is the global leader in test hyper automation. Launched in 2019, Virtuoso's SaaS software testing platform continues to redefine the boundaries of traditional test automation by providing a completely codeless solution for more robust, reliable testing that executes faster than ever before.
