based on factors like circularity and carbon footprint. Furthermore, consumer concern about carbon emissions has prompted increased investment in renewable energy, energy efficiency, and transportation decarbonization. These developments have had considerable impact on chemical end sectors, particularly in the automobile and construction industries. COVID-19 has exacerbated the situation by lowering the automobile and construction industries (as well as many others) and disrupting current supply lines.

The adoption of digital technologies by oil, gas, and chemical firms has been fueled primarily by cost savings and greater reliability. Many organizations in these areas saw excellent benefits from advanced market sensing, improved operational optimization, and expanded usage of "in silico" simulations. Companies' existing digital technologies provided an advantage with the abrupt entrance of COVID-19 and the accompanying shutdown of facilities and worksites, but they were often insufficient for the level of remote working and cybersecurity that was suddenly required.
