The global materials & chemicals industry has gained significant traction in the recent past, mainly owing to surging demand for raw materials and chemicals in a wide range of industries including buildings & construction, food & beverages, healthcare, electrical & electronics, petrochemical, water & wastewater treatment, packaging, and textile industries. Industry revenue growth is further driven by escalating demand for cost-effective and energy-efficient products, growing use of environmentally sustainable products, increasing initiatives to reduce carbon emissions, and stringent regulations enforced by leading environmental protection agencies. Hence, growing demand for lightweight, high-performance, and durable materials and

chemicals, increasing applications of specialty chemicals, and rising consumer awareness about sustainable packaging are other major factors accountable for this industry's growth.
