Reports And Data

Growth of the food & beverage industry is majorly attributed to rising global population, substantially growing demand for food, rise in agricultural activities around the world, and increasing sales of packaged and processed foods. Industry revenue growth is further driven by factors such as surging demand for organic food products, increasing demand for natural food ingredients and additives, and rise in imports & exports of food & beverages worldwide. Technological advancements in food processing and packaging solutions, increasing number of online food delivery businesses, and rising disposable incomes of consumers around the world factors further contributing to the growth of this industry.

Although no commercially green chemical products exist in the market today, ongoing research has proven that it can be used in order to meet the demand for environmentally friendly products. The aquacultures sector also has a variety of its applications. It is used as dried distiller's grains, sorghum mill feed, extruded and steam pellets and more, in aquaculture. The growth of aquaculture, particularly in the US and China, is expected to push the market forward in the coming years. The expansion of its applications is a major driving factor for the growth of the market and is also expected to offer new opportunities for growth during the forecast period.
