

Electronic Music Artist Marc Rebillet Spotlights Handy™ in Recent Livestream Event

OSLO, NORWAY, May 2, 2022

[/EINPresswire.com/](https://www.einpresswire.com/) -- New York-based improvisational electronic music artist [Marc Rebillet](#) has partnered with [Handy™](#), featuring the new high-tech stroker sexual device for men in a recent livestream DJ experience.

Marc, who brings infectious energy, positivity, and a sense of humor to everything he does, showcased Handy, as well as the hands-free mount prototype before its official launch later this year. Known for his unique beats and lyrics, Marc put Handy on full display during the interactive stream on YouTube, giving his fans the chance to discover the self-pleasuring tool, learn about how it works, and see the device's stroking movements in action.

Marc Rebillet

“

It was such an exciting opportunity for us to be part of Marc's show. We love that he's not afraid to push the boundaries with his one-of-a-kind performances.”

*Jens Petter Wilhelmsen, CEO
of SweetTech AS*

Since launching in 2019, Handy's goal has been to modernize how tech-savvy individuals masturbate and remove any stigma associated with self-pleasure. Marc is someone who doesn't shy away from his sexuality, so he was the perfect person to check out Handy's new gear and share his real-life feedback about the brand.

“It was such an exciting opportunity for us to be part of Marc's show. We love that he's not afraid to push the boundaries with his one-of-a-kind performances, including

playing his music while Handy remains in motion - front and center. Our device encourages play and pleasure, and that's exactly the energy Marc brings to his shows. This livestream was an opportunity to introduce our stroker to more people and to be part of an experience that connects people from all over the world – just like Handy's connective features,” said Jens Petter Wilhelmsen, CEO of SweetTech AS, the company behind Handy.

Thanks to Handy's ability to be programmed to follow a detailed sequence of movements, users can synchronize the interactive stroker with the media of their choice. Handy is also equipped to sync up with both virtual reality (VR) and standard video streaming from a growing list of partner sites with ready-to-sync interactive content, accurately replicating the motion that's happening on screen. What's more, the Wi-Fi connectivity capabilities of the stroker mean that it can be controlled remotely by a smartphone or computer from anywhere in the world.
