

# Interventional Cardiology Devices Industry to Observe Substantial Growth of USD 26.84 Billion by 2028

*Increasing geriatric population are significant factor driving global interventional cardiology devices market growth.*

VANCOUVER, BC, CANADA, May 4, 2022 /EINPresswire.com/ -- Interventional Cardiology Devices Market Size Worth USD 26.84 Billion in 2028

The Global [Interventional Cardiology Devices Industry](#) size is expected to reach USD 26.84 Billion at a steady

CAGR of 8.7% in 2028, according to

latest analysis by Emergen Research. The Global Interventional Cardiology Devices Market Report offers extensive knowledge and information about the Interventional Cardiology Devices market pertaining to market size, market share, growth influencing factors, opportunities, and current and emerging trends. The report is formulated with the updated and latest information of the global Interventional Cardiology Devices market further validated and verified by the industry experts and professionals.

The Global Interventional Cardiology Devices Market report contains historical, current, and forecast estimation of the revenue generation and profits for each segment and sub-segment of the Interventional Cardiology Devices market in each key region of the world. The report additionally sheds light on the emerging growth opportunities in the business sphere that are anticipated to bolster the growth of the market.

Steady growth of the interventional cardiology devices market can be attributed to rising incidence of cardiovascular diseases. Cardiovascular disease is the most common cause of death in the US, and is responsible for around 655,000 deaths every year. Coronary heart disease is the

leading heart disease type that, in 2017, accounted for the deaths of 365,914 individuals in the US.

cardiology devices deliver several benefits, including reduced chances of scar occurrence, reduced surgery complexity and time, and decreased pain. Additionally, rising incidence of cardiovascular diseases result in an increase in healthcare expenditure, which in turn, is driving revenue growth of the interventional cardiology devices market. According to the Centers for Disease Control and Prevention, heart attacks account for over USD 320.00 Billion in yearly healthcare expenditure and lost productivity, and this figure is expected to reach USD 818.00 Billion in 2030.

The key industry participants include:

Abbott Laboratories

Terumo Corporation

iVascular

Boston Scientific Corporation

Edwards Lifesciences Corporation

B.Braun Melsungen

Medtronic PLC

Koninklijke Philips NV

Biosensors International Group Ltd.

Endocor GmbH.

Others

Some Key Highlights in the Report

In June 2019, Terumo Corporation signed a partnership agreement with Orchestra BioMed, Inc. This partnership provides Terumo Corporation with exclusive rights for the development and marketing of Virtue Sirolimus-Eluting Balloon (SEB).

Angioplasty stents find application to restore blood flow occurring due to blockage and to reduce heart attack risk. Stents are considered beneficial in reducing damage caused to heart muscles in the event of a heart attack. Also, stents may instantly relieve or reduce symptoms comprising chest pain, fatigue, and shortness of breath.

Among the end-use segments, the hospitals segment accounted for largest revenue share in 2020, which can be attributed to robust presence of experienced healthcare professionals for installation of interventional cardiology devices and more advanced and developed healthcare infrastructure, along with high purchasing power for advanced and dedicated interventional cardiology devices in countries in the region. Additionally, hospitals account for adverse event minimization in patients during critical procedures, including stent installation and cardiac

catheterization.

Among the regional markets, the interventional cardiology devices market in North America accounted for largest revenue share in 2020. This can be attributed to growing awareness about cardiovascular diseases, high deployment of advanced interventional cardiological treatments, and well-developed healthcare infrastructure in countries in the region. Additionally, robust presence of leading interventional cardiology device providers in the region is another key factor causative of steady market growth.

Emergen Research has segmented the global interventional cardiology devices market on the basis of product type, end-use, and region:

Product Type Outlook (Revenue, USD Billion; 2018–2028)

- Angioplasty Stents
- Angioplasty Balloons
- Catheters
- Structural Heart Devices
- Plaque Modification Devices
- Guidewires
- Hemodynamic Flow Alteration Devices
- Others

End-Use Outlook (Revenue, USD Billion; 2018–2028)

- Hospitals
- Ambulatory Surgical Centers
- Others

Regional Outlook (Revenue, USD Billion; 2018–2028)

North America

- U.S.
- Canada
- Mexico

Europe

- Germany
- U.K.
- France
- Italy
- Spain
- BENELUX
- Rest of Europe

Asia Pacific  
China  
India  
Japan  
South Korea  
Rest of APAC  
Latin America  
Brazil  
Rest of LATAM  
Middle East & Africa  
Saudi Arabia  
UAE  
South Africa  
Israel  
Rest of MEA

Key Questions Answered in the Report:

What is the growth rate of the Interventional Cardiology Devices market? What is the anticipated market valuation of Interventional Cardiology Devices industry by 2027?

What are the key growth driving and restraining factors of the Interventional Cardiology Devices market?

Who are the prominent players operating in the market? What are the key strategies adopted by these companies?

What are the key opportunities and growth prospects of the Interventional Cardiology Devices industry over the forecast period?

Which region is expected to show significant growth in the coming years?

Thank you for reading our report. Please connect with us to know more about the report or for requesting the customization of the report. Our team will ensure the report is best suited to your requirements.
