It's one thing to write a check, and organizations world wide depend on corporate donations to continue their missions. AGM Huellas de Piedra Foundation has risen above that standard time and time again. They display a sincere interest in helping their fellow citizens. The organization utilizes corporate-like focus on the scenarios that they will be involved in, much like corporations would apply to a new service or product.

The same level of intensity and attention to detail which a corporation might apply to a research or market study seems to be utilized by AGM Desarrollos when deriving solutions and donating assistance. The charity is always focused on precise items or services that are the most needed, viable, accessible, deliverable and what may have effective long term potential at helping communities and individuals to continue, create or maintain their own economic sovereignty.
