

# Omni Ecosystems® Releases Omni Meadow™

*Omni Meadow is the next logical step and proven future of green roofs.*

CHICAGO, ILLINOIS, UNITED STATES, May 5, 2022 /EINPresswire.com/ -- Omni Ecosystems has released the new [Omni Meadow](#) green roof system. Created in the true spirit of green infrastructure and customized by geographical region, Omni Meadow reintroduces nature into the built environment by recreating native meadows that once flourished where buildings now stand. A superior, award-winning product with all the benefits of an extensive green roof, and installed by a local Omni Certified Provider, Omni Meadow is a high performing, cost-effective alternative to any green roof anywhere across the United States.

Omni Meadow is created in the true spirit of green roofs, reintroducing nature into the built world.

“

Omni Meadow is a game-changing approach to vegetated roofs. Creating truly biodiverse and beautiful green roofs that go beyond sedum is what designers imagine when they envision the future of roofs.”

*Molly Meyer, CEO & Founder  
of Omni Ecosystems*

“Omni Meadow is a game-changing approach to vegetated roofs. Creating truly biodiverse, lush, and beautiful green roofs that go beyond sedum is what designers and doers imagine when they envision the future of rooftops. Through Omni Meadow, what you’ve wanted is possible and actually incredibly easy and cost-effective,” said Molly Meyer, CEO & Founder of Omni Ecosystems.

## Easy Installation

Omni Meadow is one of the most straightforward and economical installations on the market. Because the system is comprised of a seed mix paired with Omni’s ultra-lightweight optimized engineered growing media, Omni Infinity, the weight and volume of product required

for installation is significantly lower than that of a typical extensive green roof. Starting at a 3-inch depth with a load of 14 pounds per square foot, its light weight can also allow for installation on roofs that were not designed with a traditional green roof in mind.

## Low Maintenance

The Omni Meadow is designed to be self-regenerative, with meadow plants finding their niche on each roof and working with Omni Infinity to grow a robust ecosystem over time. Only monthly maintenance visits are needed during growing season, none in the dormant season.

## Benefits

Omni Meadow provides all the same benefits of an extensive green roof and more. Omni Meadows create a habitat for local and migratory species like birds and butterflies. Scaled across an area they can provide a corridor of beneficial habitats. They manage stormwater, extend roof life, and benefit surrounding neighborhoods by reducing Urban Heat Island Effect, improving air quality, and decreasing noise pollution.

“For nearly two decades, we have been refining and applying Omni Infinity growing media to rooftops, and for more than a decade, Omni Ecosystems has been developing best practices for this nature-based technology. Now Omni Certified Providers, roofing and landscape contractors across the country, can provide expert installation and maintenance for Omni Meadow, the green roof everyone has always wanted,” added Meyer.

## About Omni Ecosystems

Omni Ecosystems integrates science and design into working landscapes to improve resiliency within the built environment and empower healthier, happier humans.

Omni invents, designs, supplies, constructs, and maintains working landscapes, which provide environmental, social, and financial benefits beyond a typical landscape. Working landscapes provide natural beauty and co-benefits, such as managing stormwater, growing crops, creating habitats, and serving as engaging spaces for people.

Omni Meadows are beautiful and diverse.

Omni Meadows are lightweight and low-maintenance.
