The rise in the prevalence of sports injuries is a major factor in driving the market growth. The injuries include various kinds of strains and sprains. It also includes spondylolysis and spondylolisthesis, stingers, disc injury, and Scheuermann's disease. Sports medicine has undergone satisfactory growth from among other healthcare fields, as these treatments can be provided for other individuals as well and not just for athletes. The extended rise in the demand for sports medicine is due to an increase in sports injuries. With an increase in awareness among individuals for physical fitness, the government is also actively taking initiatives for sports medicine to increase the participation of athletes around the globe.

The declined rate of skilled professionals in and inappropriate knowledge and guidelines about sports medicine are a restraint to the market growth. Also, the occurrence of chronic diseases worldwide has further associated with adopting a healthy lifestyle. Rising awareness about these diseases has inspired people to participate in various physical activities. Growing career opportunities for sports is also responsible for the rise in the number of athletes, resulting in quick demand in sports injury management services.
