Enhanced connectivity is increasingly enabling hospitals and healthcare professionals to leverage new technologies, drive patient satisfaction, and improve clinical outcomes. Connected healthcare extensively involves using readily available consumer technologies for providing patient care even outside of a clinical setting. Connected healthcare services mostly deal with chronic and infectious diseases, help doctors make better patient care-centric decisions, and reduce disease diagnosis, treatment, and prescription errors.

It is believed that patient engagement leads to patient empowerment and improved health outcomes. A connected healthcare infrastructure endows the patient with the opportunity to engage with their doctor or physician directly, thereby empowering them. Since the advent of electronic health records about ten years ago, technology has developed rapidly, and today, there is a host of smartphone apps and wearables that enable patients to control and update their personal health records. Using these technological innovations, physicians gain additional data and information on their patients remotely.

Market Scope:

One of the report's central components is the broad Connected Healthcare market segmentation that includes the product type gamut, application spectrum, end-user industry landscape, significant geographical regions, and the top market contenders. The report contains unbiased industry expert opinions on the current market scenario, past market performance, production & consumption rates, demand & supply ratio, and revenue generation forecasts over the estimated period. The key players' financial positions, along with their gross profits, sales volumes, sales revenue, manufacturing costs, and other financial ratios, have been accurately gauged in the report.

The report also discusses the key players involved in the market such as Microsoft, Apple Inc., Boston Scientific Corporation, Cerner, GE Healthcare, Koninklijke Philips NV, Agamatrix, Inc., Athenahealth Inc., AirStrip Technologies, AliveCor Inc., Qualcomm, Medtronic, Honeywell Life Care Solutions, Allscripts, Persistent Systems, Sanofi, and Vivify Health, Inc. as well as new entrants in the market. It focuses on the recent mergers & acquisitions, joint ventures, collaborations, partnerships, licensing agreements, brand promotions, and product launches, among others.

Reports Highlights:

The report endows the reader with in-depth scrutiny of the global connected healthcare market, with a special focus on market dynamics and segmentation.

The geographical segments of the market have been closely examined in the report.

The report further elaborates on the market's competitive scope, highlighting the top market contenders, their product portfolios, and business growth strategies.

To know more about the report @ <https://www.emergenresearch.com/industry-report/connected-healthcare-market>

The global Connected Healthcare market is broadly segmented on the basis of different product types, application range, end-use industries, key regions, and an intensely competitive landscape. This section of the report is solely targeted at readers looking to select the most appropriate and lucrative segments of the Connected Healthcare sector in a strategic manner. The segmental analysis also helps companies interested in this sector make optimal business decisions and achieve their desired goals.

Market Segmentation:

By Type:

m-Health Devices

m-Health Services

e-Prescription

By Function:

Clinical Monitoring

Home Monitoring

Telemedicine

Assisted Living

By Application:

Monitoring Applications

Diagnosis & Treatment

Healthcare Management

Wellness & Prevention

Education & Awareness
