Magnesium Silicate Market

Magnesium silicate is a white, odorless chemical compound that consists of silicon, oxygen and magnesium. It is manufactured by the precipitation reaction between sodium silicate and soluble magnesium salt and is commonly found in synthetic and natural forms. Magnesium silicate is widely used to purify absorbents, vegetable and animal oils and filler materials, such as rubber, ceramics and glass. It also aids in absorbing moisture, preventing caking and improving the texture of the product. It finds extensive application across various industries, such as pharmaceuticals, cosmetics and food and beverage.
