a CAGR of almost 7.40%.The rise of the market is primarily attributed to the increasing sales and production of automobiles across the globe. This report on the automotive wipers market accounts for all the factors such the size, share, trends, demand, growth, gross profits, earnings and revenue of the industry to evaluate the rise of the sector in the future. It asses the data gathered from the past years 2016 and 2017 while considering 2018 as the base year to give an extensive view of the trends of the industry and predict the possible growth during the years 2020 to 2028.

Market Overview:

An automotive wiper is a windscreen/windshield wiper, which is a device that keeps the external factors such as rain, water, snow, ice, and debris from accumulating on the windscreen/windshield by swinging back and forth over it. It consists of a metal arm hinging at one end and a long rubber blade on the other end. Almost all motor vehicles such as car, trucks, and watercraft vehicles are equipped with an automotive wiper. The growing consumer preference towards SUVs, hatchbacks, and crossovers along with the rising adoption of rear wipers even in entry-level cars have increased the demand for rear wipers, which in turn is boosting the growth of the automotive wipers market. The increment in the number of second-hand vehicles and recycling of wipers are other factors promoting the growth of the Automotive Wipers market.
