

# Global Joint Reconstruction Market Driving Factors by Top Key Players, Trends, Analysis and Forecasts Research 2028

*Joint Reconstruction Market  
Improvements in healthcare industry,  
skilled and efficient professionals, are the  
significant factors influencing the market  
growth*

VANCOUVER, BC, CANADA, May 10, 2022 /EINPresswire.com/ -- The global [joint reconstruction market](#) is projected to reach a market size of USD 47.98 Billion in 2028 and register a steady CAGR over the forecast period, according to latest analysis by Emergen Research. Key factors driving market growth are increasing global geriatric population, increasing implementation of awareness initiatives and programs by government schemes, rising investments in the healthcare industry, and growing demand for more advanced and efficient technologies.

“

Joint Reconstruction Market Size – USD 29.43 Billion in 2020, Market Growth at a CAGR of 6.2%, Market Trend – Increased usage of technologies in healthcare sector "

Emergen Research

Joint reconstruction is a surgical procedure used for repairing and restoring full function of joints in the human body. Emergence of new surgical techniques and technologies is resulting in a more optimistic outlook among patients needing surgical procedures to repair joints instead of opting for joint replacement. Anterior Cruciate Ligament (ACL) technique is used for treatment purposes. The ACL is crucial for maintaining stability of the knee joint, particularly while running, walking, and kicking activities. ACL surgery is generally performed using a minimally invasive procedure, but in some cases, requires

a larger incision known as open surgery.

Joint	Prevalence (%)
Knee	10.0
Ankle	10.0
Hip	10.0
Others	10.0

Technique Outlook (Revenue: USD Billion; 2018–2028)

Joint Replacement

Arthroscopy

Resurfacing

Osteotomy

Others

End-use Outlook (Revenue: USD Billion; 2018–2028)

Hospitals

Clinics

Orthotic & Prosthetic Centers

Surgical Centers
