What are the Prominent Driving Factors of Sports Compression Clothing?

Integration of exercising into daily fitness regimes of lifestyle users, and increase in replacement of gym wear by compression wear are likely to foster market growth for compression wear and shapewear products in regions like North America and Europe. The compression wear & shapewear market analysis displays that the advent of fitness institutions and increasing engagement of consumers with healthy lifestyles will expand the market size throughout the forecast period.

Recent developments in fabrics incorporated into compression & shapewear have augmented the growth of this market. Technologies such as bonding and laser cutting have transformed shapewear by removing seams, hems, and bulky fastenings. Lycra, neoprene, spandex, and nylon are the generally used fabrics by creators. Enhanced fabrics are softer, more breathable, and possess toning properties.
