Driver: The increasing popularity of blockchain technology in retail and SCM.

A growing number of retailers are recognizing the potential of blockchain technology. This industry witnesses several transactions each day, along with the exchange of information daily. The information may include authentication process information, procurement data, sales, fees, certifications, approvals, and disbursements. The amalgamation of blockchain technology with an SCM system avoids data manipulation, which is expected to be one of the biggest driving factors for the overall growth of the blockchain market.
