

# Centraleyes Announces the addition of the UAE IA Compliance Regulation to its Framework Library

*Centraleyes has recently announced the addition of the UAE IA compliance regulation to its expanding framework library.*

NEW YORK, NY, UNITED STATES, May 11, 2022 /EINPresswire.com/ -- [Centraleyes](#) has recently announced the addition of the [UAE IA](#) compliance regulation to its expanding [framework library](#).

The goal of the UAE IA Regulatory is to assist institutions within the UAE in following a uniform information security practice, ensuring the highest level of security and cyber compliance.

The regulation also ensures consistency among the entities adopting the framework. Compliance with this standard is required of all government agencies as well as any other 'Critical' entities, such as organizations that are part of the Critical National Infrastructure (CNI).

The integration of the UAE IA regulation with Centraleyes's framework library allows organizations to adhere to this compliance requirements and reap a variety of benefits, including better protection of their information assets and the development of a security-conscious culture that can help them overcome emerging security threats.

The advertisement features the Centraleyes logo at the top, which is a stylized blue eye shape. Below the logo, the text "centraleyes" is written in a large, blue, lowercase sans-serif font, followed by "Next Generation GRC" in a smaller, blue, uppercase sans-serif font. Underneath this, the text "Centraleyes next generation GRC" is written in a smaller, black, uppercase sans-serif font. The main visual is a dark blue gradient background with a cluster of circular icons representing various compliance standards: ISO 27001, COBIT 5, NIST CSF, PCI, NVDFS, SOC 2, GDPR, SIG, and HIPAA. Below this cluster, the text "Now available on the Centraleyes platform" is written in white. At the bottom center, there is a circular seal with a scalloped edge, containing the text "UAE IA" and four stars.

In order to achieve compliance with the UAE IA regulation, organizations must apply a lifecycle approach to information assurance, according to the UAE Information Assurance Regulation.

With the Centraleyes platform, organizations can receive complete visibility into their cyber risk and compliance levels, allowing them to easily apply the UAE IA compliance requirements. The platform simplifies the process of satisfying compliance by incorporating an integrated UAE IA questionnaire with an easy follow-up mechanism to assist, track and close vulnerable areas.

Using the Centraleyes platform, with its UAE IA integration, results in huge saving of hundreds of hours and resources, more accurate and measurable data and peace of mind.
